AKNOWLEDGEMENT

 My first and foremost thanks for my professor, Dr.Mir Junaid Rasool for giving this opportunity of HTML project as our assignment which lead me to increase my knowledge towards html as a programming language. And learning the its complimentary languages like HTML,JavaScript and CSS. I would also thank my groupmates and my friends who played a important role and helped my to write my code
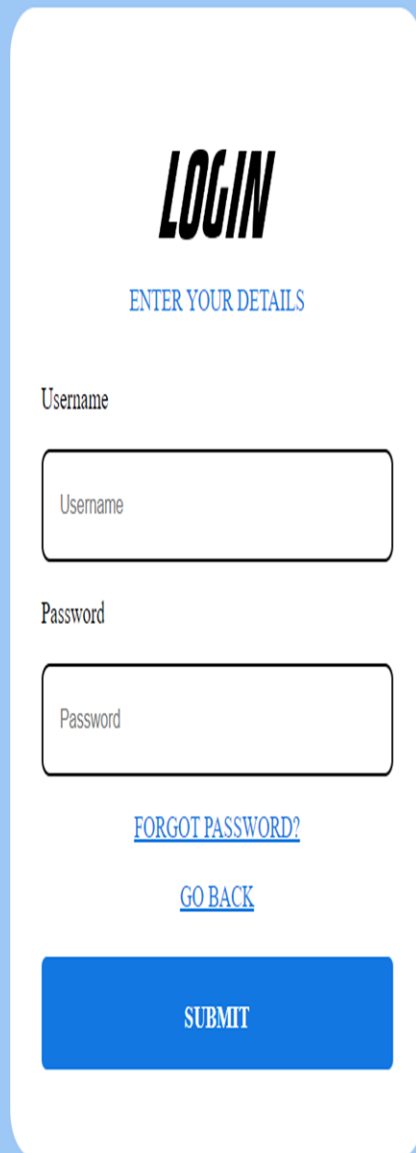

INTRODUCTION

This is a project based on html, CSS and JavaScript. where we have designed a full fledged online real-estate website called sqfeet. the website has multiple pages, basic scroll animation, CSS styles like font and icons. the website is interactive with alert popups and mail-to options

CONCLUSION:

We, together, completed this project successfully and learnt a lot during the course. We improved our technical skills and learnt how to input the creative mind and convert imagination into reality.
It was a great learning of how to design a webpage and also the benefits of working in groups.
The website created can be considered as our one of the successful projects it gave us an idea of the future waiting for us.
